IF DIRECTIONS ARE FOLLOWED,

Read Our Circular describing all symptoms.

THE SYMPTOMS:

THE SYMPTOMS OF CATARRH ARE

They generally appear at first very slight. Persons find they have a cold, that they have frequent attacks and are more sensitive to the changes of temperature.

In this disease the membranes of the lungs, heart, etc., are affected, and become thick and adhesive. As the disease becomes chronic the discharge increases in quantity and changes in quality; they are now thick and heavy, and are often covered with a thin, yellowish, watery mucus, the voice is thick and hoarse, the eyes are weak; the sense of smell is lost or destroyed; deafness frequently takes place.

Another common and important symptom of Catarrh is that the person is obliged to sleep with his head lower down from the feet during the night. When this takes place the person may be sure that his disease is on the way to the lungs, and should lose no time in seeking a remedy.

The above are but few of the many Catarrh symptoms.

A single bottle will last a month—te

be used three times a day.
